**"The 2015 TELL Kentucky Survey** helps us ensure that teachers across the Commonwealth work in schools that give them every opportunity to thrive. When teachers succeed, Kentucky's children succeed. I encourage every teacher and administrator to participate in this survey."  
—Governor Steve Beshear

Governor Beshear and Commissioner Holliday want to hear directly from every certified educator in Kentucky schools! Let's break our 2013 record-setting response rate of eighty-seven percent.

The TELL Kentucky data, as well as the newly adopted Kentucky Teaching Conditions Standards, are an integral, required component of school and district improvement plans. For details on the many ways the 2013 data has been used across the Commonwealth, please visit **www.tellkentucky.org**.

School, district, and state results will be on the website early May, 2015.
